GEZE UK invests in new sustainable packaging solutions

GEZE UK has continued its investment in sustainability and optimising operational efficiencies by installing three new packaging solutions, at its Fradley HQ, from Ranpak: the FillPak TT, PadPak Guardian and Geami Wrap 'n Go™.

FillPak TT

The FillPak TT is a void filling machine that uses paper filler material to fill empty spaces (or voids) within packaging and lock items in place. This solution will help GEZE UK to stabilise and protect its customers products during storage and shipping, by preventing movement within the box, reducing the risk of damage caused by impacts or vibrations.

As a clean, efficient, reliable and flexible solution, the paper packaging material is dispensed on-demand at high volumes, allowing GEZE UK to use less packaging material. Additionally, the paper filler material is more sustainable than plastic alternatives, which GEZE UK was previously using.

PadPak Guardian

2 | 3

The PadPak Guardian is a compact, fast and simple cushioning solution, used to protect fragile items during shipping. Shocks and vibration are controlled by cushioning, significantly reducing broken box contents and subsequent returns.

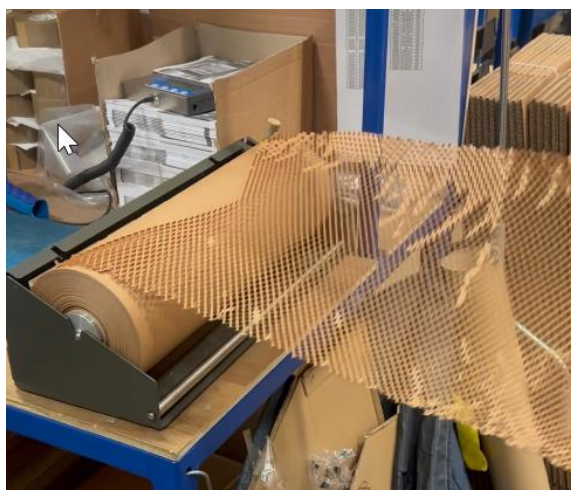

With its enhanced loading system, meaning paper can be loaded in 20 to 30 seconds, GEZE UK has already noticed significant reduction in the production time required to pack customers products. Furthermore, when a paper jam does occur, GEZE UK has been able to resolve it simply and quickly with a single button, reducing paper waste.

Geami Wrap 'n Go™

The Geami Wrap 'n Go™ converter expands environmentally friendly die-cut kraft paper into a protective 3D honeycomb structure, providing protection against scratches, surface abrasion and minor handling incidents.

This modular design has allowed GEZE UK to meet its very own very specific packaging needs and has allowed for items to be wrapped securely without adhesive tape or cutting.

12.11.2024

“I am delighted to see the installation of our new packaging system, which enhances our production efficiency and sustainability credentials. These improvements not only reduce our environmental impact but also minimise the risk of damage during delivery, ensuring that our customers receive their products in perfect condition.” – Kaz Spiewakowski, Managing Director GEZE UK.

Note to editors:

Founded in Germany in 1863, GEZE is one of the world's leading manufacturers of door and window control systems. Investing millions in research, development and manufacture of innovative solutions, GEZE sets the global standard for advanced door and window technology.

GEZE UK is the official company name and it originates from a German abbreviation, so should always be spelt in capital letters. The background: In 1901 Master locksmith Victor Gretsche joined the company and the business was renamed Gretsche & Co. GmbH. GRETSCHCO was abbreviated to **GE** for the German pronunciation of the letter G and **ZE** for the letter C.
