

COVID-19 – Strategy Plan

Thank you kindly for your communications and as you can appreciate we are working closely with all businesses to assure them that GEZE UK Ltd are doing everything we can to mitigate the risk of COVID-19 to our staff, business and those we work or interact with.

At GEZE UK we are holding daily operational meetings to understand the current status of the virus, affected areas within the country, evaluate exposure rates and confirmed cases of COVID-19 within our country and organisation.

We can confirm that we have had zero confirmed cases and are monitoring our staff daily. We are making continuity plans to ensure business activities continue normally with measures to reduce the risk to all parties.

We are all aware of the outbreak and spread of the Coronavirus (COVID-19) over the last two and a half months and the significant impact that it has had on people and communities across the world.

GEZE UK Ltd has recognised the importance of responding in a systemic, consistent and proportionate way to ensure the safety and well-being of our colleagues and their families, our customers, our suppliers and the communities in which we operate.

What steps GEZE UK Ltd has taken

We have taken the following steps to mitigate the impact of COVID-19 on our people, our operations and by extension our customers.

- Colleagues – we have reinforced with all our teams the need for good personal hygiene and have advised colleagues who have a persistent cough or fever (above 37.8c) to stay at home and seek medical advice
- Counties affected by COVID-19 – we are providing full support to our regional offices most seriously affected by the outbreak, including guidance to managers on business continuity, HR matters and protocols on the appropriate actions to take locally.
- Visitors to our locations – we have advised our teams to pro-actively engage with customers, suppliers and other stakeholders to review the origin of any planned visits to our offices and, if they originate from a geography that has imposed travel restrictions, to ask the customer to postpone their visit and/or agree alternative means to communicate remotely, e.g. video/audio conferencing, remote witnessing.
- We are currently monitoring all stock levels and continuing the production of parts as normal and don't foresee issues within our control. Transportation of stock and border controls are outside our influence but are being closely monitored to ensure we react effectively to change in circumstances.

Next steps

We continue to monitor what is a fluid and difficult situation and we are reviewing all advice from the World Health Organisation (WHO), national governments and other relevant authorities. Our priority remains to minimise risk to our colleagues, their families, and our customers. If changing circumstances mean that our response to COVID-19 materially changes, we will update you accordingly.

In the meantime, if you have immediate questions, please get in touch with your usual contact.

Kindest Regards

Gavin Downes
HSQE Manager
